Portfolio: [arien.vercel.app](#) | LinkedIn: [linkedin.com/in/aryan-jain07](#) | GitHub: [github.com/gitsofaryan](#) | LeetCode: [leetcode.com/u/arien7](#) | Email: [mail.aryan.jain07@gmail.com](#) | Phone: +91-9301525185

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Go, Python, C++ , Rust, SQL
Backend & Systems	Node.js, Express.js, Django, WebSockets, REST, GraphQL, Distributed Systems
Frontend	React.js, Next.js, Tailwind CSS, PWA
Databases	PostgreSQL, MongoDB, Redis
AI/ML	PyTorch, RAG, LangGraph, Hugging Face, Fine-tuning
Web3 & P2P	Solidity, Ethereum, Solana, IPFS, libp2p, UCAN
DevOps & Cloud	Docker, Kubernetes, CI/CD, GitHub Actions, GitLab CI, AWS, GCP

WORK EXPERIENCE & OPEN SOURCE

Protocol Labs

Remote

Open Source Mentee & Protocol Engineer

Jan 2026 – Mar 2026

- Engineered production contributions across **PLDG Cohort 6** including a **React console toolkit**, **CID upload service**, and **Guppy (Go CLI)** for the Storacha ecosystem, directly improving developer onboarding workflows.
- Architected a **UCAN-based delegation token system** enabling fine-grained secure data access control, extending its design to support **AI agent authorization** use cases in decentralized environments.
- Orchestrated **libp2p** networking primitives (peer discovery, circuit relays, gossip protocols, P2P messaging) to ship a **serverless real-time collaborative editor** with zero backend infrastructure.
- Served as **core maintainer for O3-PyTorch** (decentralized ML training on IPFS), implementing **dataset streaming**, **CID-based checkpointing**, multi-worker caching, and fault-tolerant handling of rate limiting and partial downloads, reducing training pipeline failures by eliminating single-node bottlenecks.

GoQuant

Remote

Backend Trainee Engineer

Jul 2025 – Aug 2025

- Spearheaded development of real-time trading infrastructure during a **high-frequency trading bootcamp**, engineering low-latency modules in **C#** targeting sub-millisecond execution pipelines.
- Integrated **Bitget REST & WebSocket APIs** to ingest live **L1/L2 market data** and order book updates; optimized synchronization logic within **OEMS v4**, achieving **<1ms order execution latency** and reducing order book drift by improving state reconciliation throughput.

Summer of Bitcoin 2025 (LNPrototest)

Remote

Open Source Mentee

May 2025 – Aug 2025

- Selected for **Summer of Bitcoin 2025 (~2% acceptance rate)**; implemented and extended **BOLT #1 message handling** within **LNPrototest** to deepen protocol conformance testing coverage for the Lightning Network.
- Architected a **full-stack visualization platform** (React, Flask, Python, WebSockets) to stream and render Lightning message flows in real time, reducing protocol debugging cycle time by enabling visual diff of message sequences without log parsing.

Open Source Contributor (CircuitVerse, Palisadoes, GitLab)

Remote

OSS Contributor

Oct 2024 – Present

- Drove frontend modernization across **CircuitVerse** and **Palisadoes** by migrating legacy codebases to **Vue 3 + TypeScript** and shipping a native desktop version via **Tauri (Rust)**, improving test coverage and system stability across **37+ merged PRs**.
- Ranked **Top 10 (3×)** in **GitLab** global OSS hackathons; delivered high-impact contributions to documentation, testing infrastructure, and developer experience in direct collaboration with product engineering teams.

PROJECTS

CodeSpace – Real-Time Collaborative Code Editor (React, Node.js, WebSockets)

Live | GitHub

- Engineered a **real-time collaborative coding platform** supporting concurrent multi-user editing via WebSockets, sustaining **50+ simultaneous users** with low-latency state synchronization and conflict-free session management.
- Delivered an **IDE-like environment** featuring in-browser code execution, shared canvas, and session-based collaboration, reducing context-switching overhead for distributed developer teams.

ATS100 – AI Resume Analyzer (React.js, TypeScript, Tailwind CSS, Puter.js)

Live | GitHub

- Architected an **AI-powered resume analyzer** that evaluates ATS compatibility, surfaces keyword gaps, and generates prioritized improvement suggestions to maximize shortlisting outcomes.
- Scaled to **5,000+ users** by deploying a fully **serverless architecture** via **Puter.js** for authentication, storage, parsing, and AI inference.

Duo Trace – AI Agent Observability & Audit System (GitLab, YAML, AI Agents, DevOps)

Devpost | GitLab

- Built an **observability system for autonomous AI agents** capturing end-to-end decision traces (tool calls, file access, reasoning), enabling auditability, debugging, and reproducibility.
- Designed a **multi-agent orchestration pipeline** to detect, fix, validate, and document failures with deterministic trace logging and replayable execution.

ACHIEVEMENTS

- **Patents:** Co-inventor of 3 AI/software patents (pending/granted) in intelligent automation, AI-driven analysis, and distributed systems – add patent application numbers or titles here for verifiability.
- **Open Source:** Ranked Top 10 contributor (3×) in GitLab global OSS hackathons; delivered high-impact contributions spanning documentation, test infrastructure, and core feature development.
- **Competitive Programming:** Global Rank 1528 in Meta HackerCup '25; solved 500+ DSA problems across LeetCode, Codeforces, and related platforms.
- **Fellowships & Recognition:** Selected for Solana Dev Fellowship and Amazon ML Summer School 2025; recognized as Top 10 Startup (Cisco ThingQbator) and Top 50 (Eureka'25).
- **Leadership:** Founded and scaled communities (GDSC, MLSA, UiPath), mentoring 1,000+ students and growing a 5,000+ member global network from the ground up.
- **Hackathons:** Competed in 80+ hackathons globally, securing multiple finalist placements and podium finishes across Web3, AI, and systems engineering tracks.

EDUCATION

Gyan Ganga Institute of Technology and Sciences <i>B.Tech in Computer Science and Business Systems (CSBS)</i>	<i>CGPA: 8.4</i> Oct 2022 – June 2026
Ajay Satya Prakash Public School (CBSE) <i>Physics, Chemistry & Mathematics</i>	<i>Percentage: 92%</i> June 2021 – March 2022
